

# TowerTray

## Increase **productivity** by increasing your HP LaserJet's **input capacity**

TowerTray reduces the need for continuously refilling you HP LaserJet's paper trays, allows you to use different types of stationery on one machine without refilling the printer and give the ability to emulate multi-part-forms printing.

### Impressive printing system with up to 9 paper types online

Insurance's, Banks, Law offices, Hospitals, Medical, Travel, Industrial, Government, Transportation organisations and others in need of high paper capacity or several different media types, sizes and forms welcome TowerTray.

It provides additional input trays for up to 4,100 sheets. HP LaserJet's 42x0 and 43x0 with TowerTray have up to 9 input trays – a unique organisational tool offering new dimensions in cost saving and document printing efficiency.

### Remote Paper Selection

Time consuming and disruptive routines by changing paper trays are now history. Select the required paper directly on your terminal and get complex jobs printed completely.

### Copies and Multi-Part-Forms

Print extra copies instead of copying them. You will save time and get perfect documents at lower cost. Multi-part-forms can be simulated by printing copies on differently coloured paper.

This is an economical procedure and clearly identifies the copies and their destination.

### Volume Printing

TowerTray allows high volume printing of media of the same or different type without the need to frequently reload trays.

### Rollers for convenience

TowerTray's control unit has rollers with tip-over preventions which allow convenient placing of the system.

### Easy Installation

Configure TowerTray with up to 4 trays and place your HP LaserJet (with or without HP's optional trays) on top of it. Install the tip-over prevention's, connect the interface cable and mains cable and power it on. The printer will automatically recognize the reliable TowerTray that looks like a HP option.

### Lockable Trays for Sensitive Media

TowerTray can be ordered with lockable trays to protect sensitive media from misuse.

## Specifications

Base Unit - 2 500 sheet trays plus 1 control unit with rollers

- Unit dimensions (mm) 475 x 510 x 360
- Unit weight 25 kg

Middle trays (optional, max. 2)

- Unit dimensions (mm) 415 x 450 x 125
- Unit weight 7 kg

Paper weights (60 – 120 g/m<sup>2</sup>)

Capacity (500 sheets, 75 g/m<sup>2</sup>)

Formats according to original HP tray
