

# BlueTrack USB

# PF

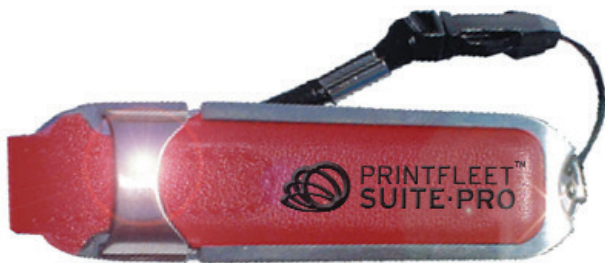

## Rapid **assessments** for **power** users

BlueTrack USB PF combines the core functionality of our basic rapid assessment tool, BlueTrack USB DA, with powerful additions that take rapid assessment to a new level :

- SmartScan discovery and data collection
- Intelligent network recognition & file mapping
- Support for HP maintenance kit levels
- Advanced error code collection
- Data sorting from the user interface

For sales representative and service technicians who are looking to perform rapid assessments on client sites with 50 to 5,000 printing devices, BlueTrack USB PF makes it easier and more powerful than ever before to quickly collect and analyze imaging trends at clients' printing environments.

### *Taking rapid assessments to a new level !*

#### SmartScan Discovery

SmartScan eases the device discovery process by automatically finding the right IP addresses and subnets of printing devices on the network, and performing the fastest scan you've ever seen.

#### Network Recognition and File Mapping

BlueTrack USB PF recognizes when you've been to a client location before. Each client will have their own data folder, keeping account information organized and easily accessible.

#### HP Maintenance Kit Support

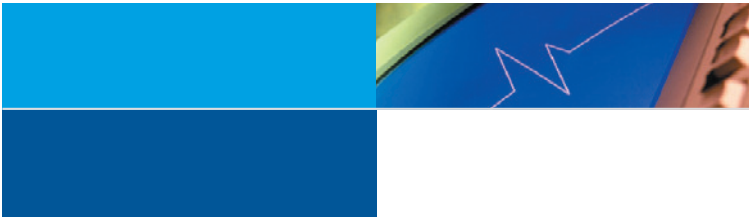

HP maintenance kit levels will be added to the list of data BlueTrack USB PF collects, allowing dealers to provide even better proactive supplies fulfillment.

#### Advanced Error Collection

Additional error code information, such as specific vendor codes will allow the IT manager or service technician to recognize more complicated problems.

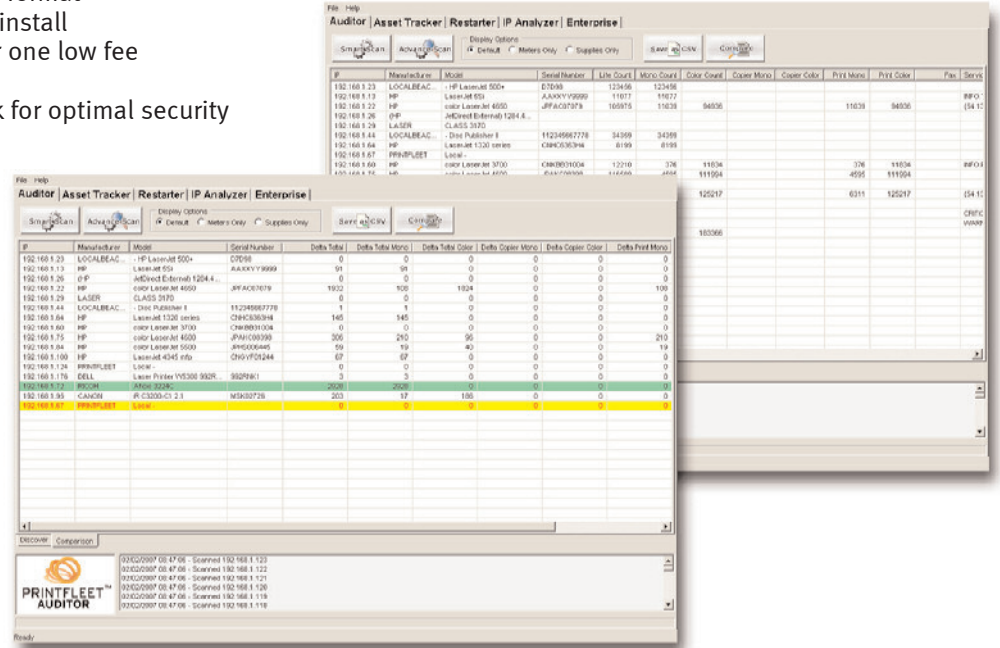

#### Data Sorting

Sort data directly in the software interface by clicking on the desired column header, or click and drag to move columns into the order that best suits your needs.

BlueTrack USB PF also includes the original features of BlueTrack USB DA that have made it the #1 choice for rapid assessment:

- Simple and convenient USB format
- No software or hardware to install
- Unlimited network scans for one low fee
- Custom brand the interface
- Runs internal to the network for optimal security

## 4 Powerful Programs

### 1 Auditor

Discovery and data collection application collects all of the critical information you need to perform a rapid assessment.

### 2 Asset Tracker

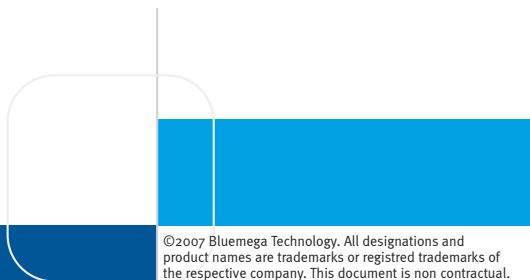

Embeds missing serial numbers, departments, asset numbers, and locations to the printer memory for easy tracking.

### 3 Restarter

Reboots devices directly from the user interface.

### 4 IP Analyzer

Locates used and available IP addresses on the network.
