

# CHAI Accounting Lite<sup>®</sup>

Simple but effective print job accounting

## CHAI Accounting Lite captures print job and consumables data on the printer to provide accurate and comprehensive information to track and allocate printing costs

Particularly as you invest in increasingly powerful printing hardware, it makes sense to share the costs of the expanded functionality across different workgroups, departments or projects. Often the fact that printing costs are being monitored is enough to inform better use of valuable resources. But whether you are dividing up running costs and consumables between different entities within the organisation, or monitoring costs associated with a particular asset or project, you will not get far without detailed usage information. Above all, whether you are in a small or medium sized business looking to manage a small printer pool, or in a larger organisation, looking for a way to track the usage of specific printers, you need an inexpensive, plug and play solution that does not create inappropriate overhead!

CHAI Accounting Lite makes controlling and allocating print costs both simple and clear. Simple because the software runs directly on the printer and does not need to be installed on print servers, and clear because it makes a comprehensive range of reports available using nothing more complicated than a standard web-browser.

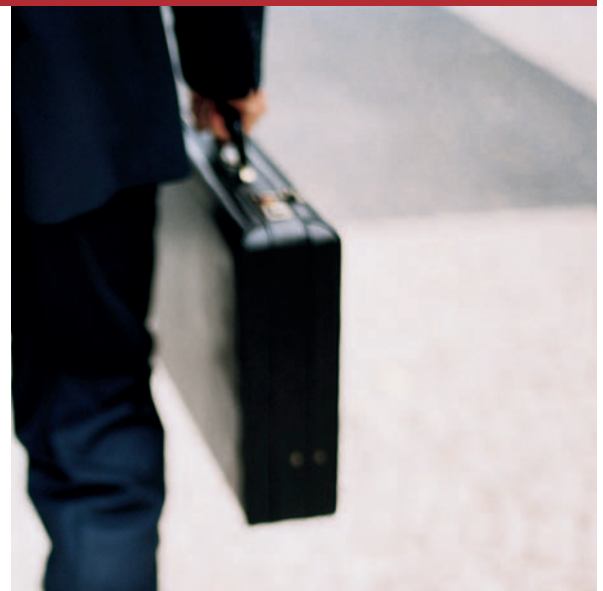

### How CHAI Accounting Lite works

CHAI Accounting Lite is an applet that runs directly on the Chai Virtual Machine embedded in recent HP workgroup and departmental LaserJet printers. The software is installed on the printer over the network, and can then be configured, queried and controlled via a web-browser.

Maintaining the solution only means ensuring your prices for cartridges and paper are kept up-to-date. CHAI Accounting Lite then captures the type of paper and the amount of toner used for each print job to calculate the cost, and stores this information with details of date and time, document name, user, originating PC, and the number of pages sent and processed in colour or black-and-white. A selection of reports presents this information in the web-browser by individual job, user or originating PC, or for all printer activity.

**Business Partner**

### Characteristics

- Chai applet using the embedded virtual machine and web-server of HP LaserJet printers to capture exact toner and paper usage and calculate accurate costs
- Reporting according to print job, originating user or PC, or printer activity

### Areas of application

- Controlling the use of expensive, shared printing hardware
- Allocating the running costs of shared printing hardware in a fair and transparent way
- Managing the costs of small printer pools
- Monitoring printing costs for particular departments, projects or printers

### Special features

- Uses a simple web interface for configuration, control, and reporting
- Captures the toner coverage for each cartridge separately on HP Color LaserJet printers
- Exports user, PC or printer reports to Excel, for further processing

### Ordering information

CHAI Accounting Lite is available for:

- HP LaserJet 2300-4100-4200-4300-9000 printers
- HP Colour LaserJets 3700-4600-4650-5500-9500 printers
- HP LaserJet 4100-9000-9055-9065-9085 MFP printers
- HP Business Inkjet 3000 printers
- And all derivated models (L/N/D/DN/T/TN etc.)
