TowerFeed™

**making paper
work for you**

TowerFeed™ can expand your HP LaserJet printer to ten input trays for process improvements, cost savings and greater flexibility.

How much time is wasted in your organisation making sure the right paper is in the printer? How often does your staff have to make copies and collate multi-part forms? Whether it is a trip to the printer to feed in different paper, or just to refill the input tray, or if it is the time and effort spent at the copier, it is work you do for the paper, and not work that the paper is doing for you.

TowerFeed can look after much of your paper handling for you, solving existing problems and opening up opportunities for streamlining processes and cutting costs. TowerFeed can extend your HP LaserJet printer to ten input trays that you can assign and combine to optimise the variety and capacity of paper and media (pre-prints, colored paper, transparencies ...). This increases your flexibility, extends the refill interval, and speeds the preparation of multiple originals all with the same high quality and readability, at up to 50 pages per minute – without photocopier maintenance or copying fees.

Or produce multi-part forms, replacing impact printers and expensive chemically coated paper with coloured paper to differentiate copies for distribution and tracking. Indeed, combined with an electronic forms solution, TowerFeed becomes a self-contained solution, producing forms that are always up-to-date and that eliminate waste, pre-printing, storing and obsolescing.

**how TowerFeed
works**

By taking advantage of HP's Accessible Architecture, TowerFeed is easily attached to the underside of your HP LaserJet printer. Different models are available that add up to 7 input trays, for desktop or floor standing use. TowerFeed becomes an integral part of your HP LaserJet printer, and can be controlled and monitored from the standard printer panel and the Windows drivers, enabling paper selection at the printer, from the workplace, or by integration into applications (including SAP and Baan) and electronic forms software.

Printed on an HP Colour LaserJet Printer

characteristics

- desktop models with 3 or 4 trays
- floor models with 4, 6 or 7 trays
- each tray holds 500 sheets (80 g/m²)
- drawers for A4 paper size
- drawers for US paper sizes optional (US letter, US legal)
- for hp LaserJet 9000 and 8150 printers: drawers for A3 or US ledger optional
- paper weights from 60 to 100 g/m²

areas of application

- up to 10 different paper types in the printer system (letterheads and forms, coloured paper, transparencies, cover sheets, etc.)
- electronic multi-part forms instead of carbon sets on impact printers

special features

- easy to install
- supported by standard hp printer drivers
- supported by SAP R/3 and Baan
