* Top module acts as paper deflection unit. It contains no paper.

HP-CLJ 4650 / TowerFeed, print system with up to 7 paper types online

Insurance's, Banks, Law offices, Hospitals, Medical-, Travel-, Industrial-, Government-, Transportation organizations and others in need of high paper capacity or several different media types, sizes and forms welcome TowerFeed.

It provides additional input trays for up to 3'100 sheets out of up to 7 input trays - a unique organizational tool offering new dimensions in cost savings and document printing efficiency.

Remote Paper Selection

Time consuming and disruptive routines by changing paper trays are now history. Select the required paper directly on your terminal and get complex jobs printed completely.

Copies and Multi-Part-Forms

Print extra copies on the printer using paper from a tray with plain paper. You will get a perfect document, not a copy of a copy.

For multiple copies use colored papers from other trays.

Multi-part-forms can be simulated by printing copies on differently colored or preprinted paper.

This is an economical procedure and clearly identifies the copies and their destination.

High Volume Printing

TowerFeed allows high volume printing of media of the same or different type without the need to frequently reload trays.

Easy Installation

Place your HP Color LaserJet 4650 without additional paper trays onto TowerFeed. Connect the interface cable and the mains and power it on. The printer will automatically recognize the TowerFeed option.

System support is available for Windows™ environment.

Manufacturer

Rutishauser Data AG, a leading Swiss manufacturer of paper handling equipment. All Rutishauser products are designed for ease of use and are of high quality and reliability.

TowerFeed is also available for other HP LaserJet printers, e.g. for LJ-4200/4300, LJ-8150, LJ-9000 series.
